Permission to Conduct Acceptance Testing

Date: 04/23/26

Dr. Isa Pab Geen A. Pagud
BAO Director
Economic Enterprise Unit

Dear Dr. Pagud

We hope this message finds you well. As part of our system development process for the project titled “BukSu EEU’s Ordering System and Shopping Platform”, we are now in the final phase and would like to formally request your permission to conduct a System Acceptance Testing with you as our client.

The purpose of this testing is to verify that the system meets the requirements and functionalities previously discussed and to ensure it is ready for deployment. We are committed to making the process efficient and respectful of your time.

The Acceptance Testing will include:

- A walkthrough of key client-requested features
- Hands-on testing with short task scenarios
- A brief feedback form for your approval or comments

We are available to conduct the session at your preferred time and date, and we anticipate it will take no more than 30 minutes.

We sincerely appreciate your time, input, and continued support in this project. Please let us know if we may proceed with scheduling the session.

Sincerely,

Erica Casiño
BSIT
Bukidnon State University

Project Title: BukSu EEU's Ordering System and Shopping Platform

Client/Department: Dr. Isa Pab Geen A. Pagud

Team Name/Developers: NanoTech Production

Date of Testing: 04/23/26

Client-Focused Acceptance Test Plan

Feature	***Client Task Description***	***Expected Result***	**Result**(Pass/Fail)	**Client Remarks**
Account Registration	*Register using institutional account*	*Account registered successfully and is added to the database*		
Order Products	*Order a product in the home page*	*Product ordered Successfully and the customer must wait for the receipt*		
Browse/Search Product	*Enter keyword in search*	*Matching products*		

	box	*displayed with images and prices*		
View product details & reviews	*Click on any product*	*Full details shown including description, ratings, and reviews*		
Add / Remove product from cart	*Click “Add to cart” then view shopping cart*	*Items appears in shopping cart and can be removed without issues*		
View product details & reviews	*Click on any product*	*Full details shown including description, ratings, and reviews*		
Add / Remove product from cart	*Click “Add to cart” then view shopping cart*	*Items appears in shopping cart and can be removed without issues*		
SuperAdmin Functions				
Manage Admins Accounts	*Create/enable/disable admins*	*Changes applied immediately*		
Generate Reports	*Click Reports*	*Reports Display accurate data (Sales overview, inventory, Generate reports)*		

Download reports	*After Generating reports Click the download pdf button*	*PDF file downloads with formatted report data*		
View all admin activity audit trails	*Navigate to Activity Logs*	*Complete history of all admin actions visible with filter*		
Admin Functions				
Add/edit/Archive products	*Fill product form and save*	*Product appears in list; can be edited or archived without deleting*		
Update order statuses	*Change order status from dropdown*	*Status updates immediately; customer will be notified*		
Review moderation (hide/unhide)	*Click any products Click hide on inappropriate reviews*	*Review disappears from customer view but data is preserved*		

Client Feedback Form

Name of Client/User: Dr. Isa Pab Geen A. Pagud
Role/Department: BAO Director
Date: 04/23/26

1. Were you able to complete the tasks provided?
    - ☐ Yes, smoothly
    - ☐ Yes, with some difficulty
    - ☐ No
2. Were the system's features easy to understand and use?
    - ☐ Very Easy
    - ☐ Somewhat Easy
    - ☐ Difficult
    - ☐ Very Difficult
3. Did the system meet your expectations based on the goals you shared?
    - ☐ Yes, fully

- ☐ Mostly
- ☐ Not really
- ☐ Not at all

4. Are there any features you feel are missing or need improvement?

_____

_____

5. Do you have any final comments, suggestions, or concerns?

_____

_____

---

4. Final Approval Status

[ ] Approved – All features accepted as functional and satisfactory.

[ ] Provisionally Approved – Some revisions requested, but the system is largely acceptable.

[ ] Not Approved – Major issues need to be addressed before deployment.
